Northbridge Biology Lab: AI Review Board Notes (SYNTHETIC TEST DOCUMENT)

This is a synthetic document made for testing. It describes a fictional lab at a fictional university.

The lab's AI review board meets on the first Tuesday of each month at 2 PM in Room 214 of the Life Sciences Building. Meetings are open to all lab members.

Before a new project may use a generative AI tool on research data, the project lead must submit a one-page data use plan to the board at least ten business days before the meeting. The plan names the tool, the data it will see, and who can access the outputs.

Projects that use human-subjects data also need written approval from the Institutional Review Board before the AI review board will consider them.

The board keeps a public list of approved tools. As of this term, the list contains two tools: a licensed transcription service and the university's private chat assistant.
